Summary

Senior QA Automation Engineer and QA Lead with **13+ years of experience** driving quality engineering across **Web, Mobile, API, Cloud, and AI-powered platforms**. Currently **leading QA strategy for Generative AI solutions**, including **Voicebots, Chatbots, and Smart Document Analyzer** applications. Experienced in **validating AI models** through scorecard design, benchmark analysis, prompt evaluation, and functional testing of Adaptive SLMs to ensure reliable, accurate, and production-ready AI experiences. Passionate about architecting scalable **automation frameworks**, embedding quality through **CI/CD integration**, and leading global QA teams to deliver secure, scalable, and high-performing AI-powered solutions using technologies such as **Genesys Cloud, Azure, Deepgram, and AKKA**.

Experience

Senior QA Specialist – Deloitte Canada

Nov 2021 – Present

- Built and scaled enterprise **automation frameworks** using **Cypress** and **Playwright**, achieving **96% automation coverage** and significantly improving regression efficiency.
- Optimized automation frameworks with reusable components, **reducing test execution time by 98.6%** and **regression cycles by 70%**.
- Integrated automated testing into GitLab **CI/CD** pipelines and implemented **Shift-Left testing** practices to **improve release quality** and **delivery speed**.
- **Lead QA strategy** and **mentor QA engineers** across **Web, API, Cloud, and AI-driven applications**.
- Drive quality validation for **Generative AI solutions**, including **Voicebots, Chatbots, and Smart Document Analyzer** applications.
- Define **AI testing strategies**, quality standards, and **evaluation criteria for AI-powered systems**.
- Develop **AI model scorecards** and **validate benchmark** results across accuracy, consistency, latency, and performance metrics.
- Perform AI response validation through **prompt testing, contextual accuracy checks, factual validation, and business rule verification**.
- Test **Adaptive SLM models** to ensure reliable, accurate, and context-aware responses across workflows.
- Execute end-to-end Voicebot testing using **Genesys Cloud**, **validating call routing, conversational flows, speech recognition, intent handling, and AI responses**.
- Validate **Chatbot** and **Document Analyzer functionality**, including **conversation journeys, OCR accuracy, data extraction, classification, and summarization**.
- Perform **AI robustness testing** including **red teaming, adversarial testing, prompt injection testing, and edge-case validation**.
- Collaborate with AI Engineers, Data Scientists, Developers, and Product Owners to **improve AI quality and user experience**.

Senior Consultant (QA Lead) – Deloitte USI

Nov 2018 – Oct 2021

- **Converted Manual test cases to Automated test scripts**, reducing test **cost/time by 20%**.
- Created robust **test plans** from the **Function Specification Document** to improve release confidence.
- Developed POCs using **Robot Framework** for web and API automation.
- Led and **Boosted team productivity by 45%** through cross-functional QA strategy alignment.

Software QA Engineer + Software Developer – Directi Internet Solutions (Zeta)

(Oct 2015 – Nov 2017) (Nov 2017 – Nov 2018)

- Developed and enhanced web applications using **Vue.js**, gaining strong understanding of **application architecture** and user workflows.
- Designed and executed **web & mobile** testing, performed **defect analysis**, and conducted **root cause analysis** to improve product quality.
- Supported CI/CD integration and **deployment automation**, improving **release efficiency by 60%**.

Device Associate Lead – Amazon Development Centre

Jan 2013 – Oct 2015

- Led **functional**, **localization**, and **media testing** for Amazon, ensuring product quality across **multiple markets**.
- Validated media **playback**, **performance**, and **QoS** metrics to ensure reliable customer experience.
- Analyzed defects, supported **root cause investigations**, and collaborated with cross-functional teams to improve device quality.

Technical Skills

- **Automation:** Playwright, Cypress, Selenium, Appium, Robot Framework
- **Programming:** Python, JavaScript, TypeScript
- **API:** Postman, REST Assured
- **AI Testing:** Prompt Validation, Model Evaluation, Voicebot, Chatbot, Red Teaming, Adversarial Testing
- **Cloud:** AWS, Azure, GCP
- **CI/CD:** GitLab CI/CD, GitHub Actions, Jenkins
- **AI Platforms :** Genesys Cloud, Deepgram, AKKA and Adaptive SLM Models
- **AI Assisted Development :** Copilot, Cursor AI, Gemini and ChatGPT

AI & Generative AI Testing

- | | |
|----------------------------|-----------------------------------|
| • Generative AI Testing | • Response Quality Validation |
| • Adaptive SLM Testing | • Voicebot Testing |
| • Prompt Validation | • Chatbot Testing |
| • AI Model Evaluation | • Smart Document Analyzer Testing |
| • AI Scorecard Development | • AI Functional Testing |
| • Benchmark Score Analysis | • Red Teaming |
| • Hallucination Detection | • Adversarial Testing |

Education

Bachelor of Engineering – Visvesvaraya Technological University

Certifications

- Professional Scrum Master (PSM) Certification
